SOLAR PV BATTERY STORAGE EV CHARGERS

EV CHARGERS

WHAT'S INCLUDED ON ALL EV INSTALLATIONS

UK POWER NETWORK APPLICATION

An EV Charger is a low carbon technology (LCT) installation. As an approved installer for UK Power Network, we will handle your application. This will notify them of the install and ensure your electricity supply is sufficient, if not UK Power Network may need to upgrade it before approving.

WASTE REMOVAL SERVICE

Here at Baskett Electrical Ltd, not only do we strive to deliver the best installations, by using market leading products. But we also care deeply about the environment, so we offer a free of charge waste removal/collection service, so we can both be assured the relevant waste materials and products get reused if possible or at least correctly recycled.

ACCREDITED INSTALLATION

We are fully accredited by all the companies below. To ensure we are working to the highest standards in the industry set out in the Consumer Code, highlighting quality, competency and compliance. Giving you peace of mind we will conduct ourselves properly and professionally before, during and after your installation is complete and all work carried out.

EV-ULTRA CABLE

One of the biggest difference between Baskett Electrical Ltd and our competitors is the EV-Ultra Cable we include and use on **all** our EV installations.

Doncaster Cables - Ev-Ultra Cable is specially developed to meet the requirements of EV charge points with data connectivity.

The cable incorporates power conductors and an enhanced Cat 5 screened data cable, encapsulated in a double sheathed design for extra protection.

FEATURES & BENEFITS

- Power and data combined in one cable
 - Less storage space required
 - Easier to handle
- Easier to route through walls and buildings
 - Saves installation time
- Gives a cleaner, neater looking installation

HANDOVER AND CERTIFICATION

What you can expect to receive upon completion of your project:

- Operation and Maintenance manuals
 - Warranty information
- **Electrical installation certificate**
- Invoice for payment received (This acts as proof of ownership)

INSTALLATION EXTRA

EV CONSUMER UNIT INCLUDING SURGE PROTECTION

£260 (VAT Included)

+£55 IF EXTERNAL

WHAT IS IT?

SPD is a surge protective device that protects electrical systems and equipment from power surges.

WHAT IT DOES

SPDs limit voltage spikes and divert surge currents to protect electrical systems and equipment.

WHERE IT'S INSTALLED

SPDs are usually installed in a consumer unit or distribution board, but can also be installed locally to protect a single item of equipment.

HOW IT WORKS

SPDs can protect against a range of surge voltages, from a few millivolts to tens of thousands of volts.

OCTOPUS ENERGY TARIFF'S

OCTOPUS GO

The smart tariff with super cheap electricity between 00:30 - 05:30 every night
Fill up for a tenth of the price of a traditional car with Octopus Go, and keep your fuel costs around 3p per mile

MYENERGI APP

Seamlessly integrates with your whole home energy eco system, working with your solar panels, home battery, heat pump and energy tariff, for true energy independence.

3 YEARS WARRANTY

3 CHARGING MODES

Whether you need a “fast” charge to get you going in a hurry or are happy to wait for your charge to take place using 100% renewable energy, Zappi gives you the flexibility.

OPTIONAL EXTRAS

ADDITIONAL COLOUR

•White

SOLAR CT

To measure the output from your PV panels you need an extra current transformer (CT) connected around the live wire on the output from the PV inverter.

The PV CT is not essential - Zappi use the grid CT for their control - but you do need one if you want to track your PV generation and usage in the app

HARVI CT

Harvi is a clever little device that allows the Zappi to be installed without wiring a direct CT clamp.

£100

Additionally if you recommend us to any family and friends and they decide to get a Solar PV & Battery storage installation with us, we will give you and them a £100 Gift voucher of your choice!

(Terms & Conditions Apply)

OUR REVIEWS

Take a look at what our EV Charger customers have to say about us.

We have used Baskett Electrical for previous work so naturally turned to them to enquire about EV Charger installation at home. Once again we weren't disappointed. We now have a great EV Charger installed by a friendly & knowledgeable member of the team. Thank you again Baskett Electrical.

SHARON

Great service received from Baskett Electrical from initial enquiry to finished installation of home EV charger. Good communication was upheld throughout the process and appointments kept as prearranged and on-time. I would therefore highly recommend Baskett Electrical Ltd to friends and family in the future.

ROY

Really happy with the Zappi charger installation from Baskett Electrical. Super easy to deal with, turned up on time, did a really neat job and left everything tidy. Charger works perfectly - would definitely recommend!

LAURA

From initial enquiry through to final installation, Baskett Electrical have been a pleasure to deal with. Their quote for a EV charger was prompt and competitive and subsequent communication with the office highly efficient. Their installer (in our case Dylan) was knowledgeable, helpful and a very nice man. I would have no hesitation in recommending them.

JOHN

Baskett Electrical supplied & fitted an EV charger for me. They responded quickly to my enquiry, provided a competitive quote and looked after all of the paperwork. Once approved installation was very quick. Overall, from enquiry to a working EV charger took under 2 weeks. No point in relying to use the big boys like Octopus, EON etc when you have local businesses like this around!
